

Script for JDK

--Begin Audio Recording--

First of all, thanks for agreeing to participate in this study!

I will be asking you to perform a series of tasks to complete to the best of your ability.

A reminder: I am not testing you, I am testing the prototype, so mistakes are perfectly okay and are, in fact, quite useful information!

If you have any comments during the study, please hold on to them. There will be a short survey at the end where space for comments will be provided.

Ready? Let's start.

--Begin Screen Recording--

Task 1: Get more info on the United States election. Done? Close it.

Task 2: Unfavorite Australia.

Task 3: Change the view to Regions. How many regions have favorited items?

Task 4: Go to Settings. Turn off Push notifications.

--End Screen Recording--

You're done! Please fill out the survey.

Thank you for participating!

--End Audio Recording--

## Recording consent form

Thank you for participating in our usability research. We will be recording this session for future evaluation. Please read the statement below and sign where indicated if you agree to participate.

---

I understand that my usability test session will be recorded. I give permission to Jacob Kinley to use this recording for the purpose of improving the designs being tested.
